NETFLIX · DATA STORY

AROUND 2018–2019, NETFLIX'S ADDITIONS PEAKED AND PIVOTED

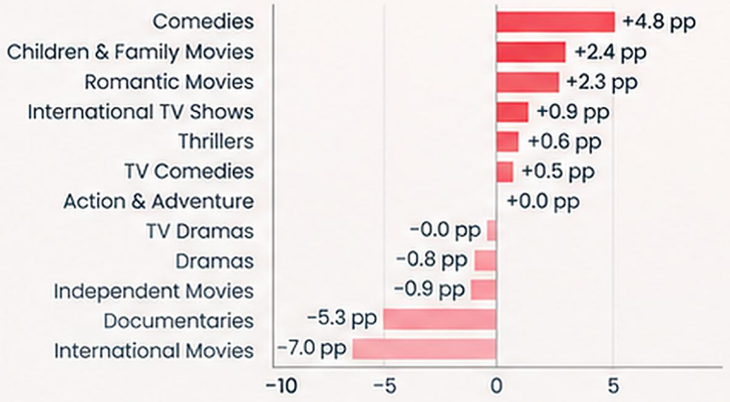

What kind of company is Netflix now, and when did it change?

01 TV shows grew from 26.8% to 30.5% of additions

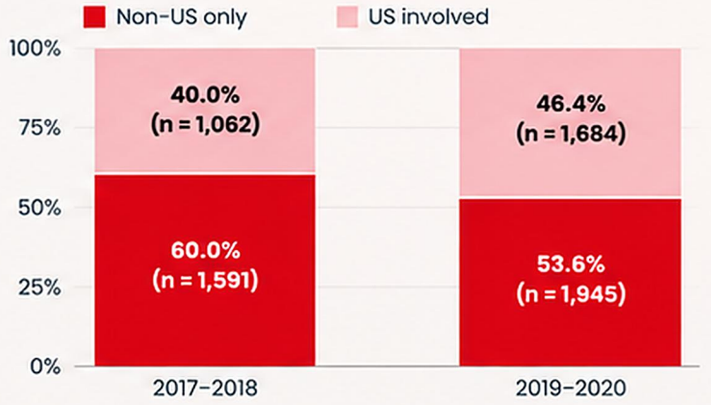

H1 – Survived, but the increase is modest: a gradual drift in mix, not a sharp pivot to TV. n = 2,837 / 3,895.

02 The mix changed: comedies and family up, international and documentaries down

H3 – Survived: away from the international-movie and documentary wave, toward mainstream comedy and family.

03 Non-US-only titles fell from 60.0% to 53.6% of additions

H2 – Rejected: Netflix's additions became more US-linked after 2018, not less. n = 2,653 / 3,629.

WHAT THIS DATA TELLS US

2018–19
the turning point.

2,016
titles added in 2019: additions peaked.

69.6%
of all titles are movies: still movie-dominated.

WHAT THIS DATA COULD NOT TELL US

What subscribers actually watched, what was removed from the catalogue, and anything after September 2021.
